2. **Sarah Dede Boakye**	**052441360072**
3. **Olando Owusu**	**052541360194**
4. **Abigail Mensah**	**052441360169**
5. **Kusi dwumfour Jeff**	**052441360173**

Brief Explanation

The Online Course Registration System is a web-based application developed to automate the process of student course registration at Kumasi Technical University. The system allows students to register for courses electronically while enabling administrators to manage course information efficiently, thereby reducing manual work, errors, and delays associated with traditional registration methods.

Features Implemented

The system provides secure student registration and login functionality. Students can view available courses and register for their selected courses through an online dashboard. An administrator module allows the creation, updating, and deletion of

courses. All student, course, and registration data are stored in a database, with password hashing, session management, and input validation applied.

Challenges Encountered

Implementing secure authentication and managing user sessions, particularly separating student and administrator access, also required careful handling. Ensuring proper input

validation and consistent interface design across all pages took additional effort.
